

Entry 1

Question Or Problem

What were you trying to figure out?

The Main thing I needed to create was text files, so I did research and watched some YouTube videos on how to solve that issue. It showed me how I could create a text file in a file.

Entry 2

Source Used

Where did you look for help?

Youtube.  VB .Net Create Text File

Entry 3

Result And Next Action

What did you learn, and what did you do next?

I learnt the code needed to create the text file in the folder. The following week, putting Boolean in it was pretty easy. Prof Stalbert's Video explained it very well.

Entry 1

Question Or Problem

What were you trying to figure out?

I was worried that my code wasn't working because when I added JSON, it wasn't creating the JSON file.

Entry 2

Source Used

Where did you look for help?

I did research online and re watched that was provided to us on YouTube.

Entry 3

Result And Next Action

What did you learn, and what did you do next?

I realized I had added the JSON to the wrong file, so the system couldn't create the file cause it didn't exist yet in the system.

Entry 1**Question Or Problem**

What were you trying to figure out?

I was trying to figure out how to make my app easier to understand for someone else looking at my code.

Entry 2**Source Used**

Where did you look for help?

I looked at my code, the assignment requirements, and examples of comments for functions and procedures.

Entry 3**Result And Next Action**

What did you learn, and what did you do next?

I learned that comments help explain what each part of the code does. After that, I added comments to my Subs and Functions so the purpose, inputs, and results were easier to follow.
